Letter of Guarantee

To: Esteemed Customer,

Subject: Extension in availability of M10 and M12

Respected Customer,

We hereby officially guarantee that the supply date for our R1.0 version modules, M10 and M12, has been extended until December, 2013.

This extension in the dates of module supply is a result of courtesy from Mediatek, who has gracefully extended their MT6223 chipset supply-date especially for us, only due to the unique and strategic relationship that we share with them.

Mediatek has always given priority to Quectel in chipset-supply since we are the first and only successful M2M vendor who has developed GSM modules using their chipsets.

Please rest assured that we will continue to receive support from MTK for many years to come and we will ensure to pass on this advantage to our esteemed customers.

R1 modules are always available in stock, so please feel free to place your orders.

Thank you for your support.

Yours Sincerely,

Patrick Qian (CEO)

Quectel Wireless Solutions Co., Ltd.
